Dark Green Mag

Premium Wordpress theme

Set-Up Guide

Step 1: Download and install Dark Green Mag:

You have already downloaded the zip file *darkgreenmagg.zip*. You will find 2 folders in the theme pack.

1. Dark Green Mag

2. Plugin required for the theme.

Upload the the plugins to your *site/wp-content/plugins* folder via FTP. Once uploaded, go to the plugin section of your wordpress admin panel and activate the plugins. Next upload the theme folder to your *site/wp-content/themes* folder via FTP. Once uploaded activate the theme via the design section of admin panel.

Step 2:

Customization: Once the theme is installed go to the custom theme option (*Dark Green Mag Option*) page of the Dark Green Mag theme. You will find different options which deals with the various modules of this magazine theme. I will explain them one by one.

1. Featured content gallery

Featured content gallery is the module located at the top part of the theme. It shows a content glider with images of 640 x 350 , which is associated with posts via a custom field. You can select a particular category and number of posts to display in this module. Once a category and number is selected, the module will display images from the latest posts of that category.

Note: Click on **setting** and then click on **Featured content gallery** to update the gallery settings

Enter category name, number of item to display (*4 or 5 is good*) gallery width :640 , gallery height:350 and text overlay height : 50 (*if you want to enter your custom height you can check which is suitable for you*)

Featured Content Gallery Configuration

Use the options below to select the content for your gallery, to style your gallery, and to configure the gallery slides and transitions. Visit the Featured Content Gallery Plugin website for more information.

Featured Content Gallery Code - If not already included, add this code to your template file where you want the Featured Content Gallery to be displayed:

`<?php include (ABSPATH . '/wp-content/plugins/featured-content-gallery/gallery.php'); ?>`

Featured Content Selection - Select either a blog category or individual post/page IDs for your featured content:

◉ Select here to use category selection   ○ Select here to use individual post or page IDs

Category Name: Post or Page IDs (comma separated no spaces):
General

Number of Items to Display: ☑ Check here to randomize post/page ID display
3

Gallery Style - Choose your gallery size and colors:

Gallery Width in Pixels: Gallery Border Color (#hex or color name):
640   #ec348a

Gallery Height in Pixels: Gallery Background Color (#hex or color name):
350

Text Overlay Height in Pixels: Gallery Text Color (#hex or color name):
50

You can assign these images to posts via custom fields. After making a post scroll down to the custom field section and enter the following custom field values.

Custom field key - **articleimg** (*case sensitive*)

Custom field value - **url of the image**

Custom Fields

Name	Value
