2. Using thumbnails via custom fields.

The images shown in the sliding panel are added using custom fields. When you make a post you can create a custom field with the image you want to associate with that post. How it is done is explained below.

1. Go to Admin panel > Write post
2. Give post title, and write down the content.
3. Select *Add media > Add an image > Upload your choice of image (size 200px X 120 px)*
4. Scroll down to the *Custom field area* and set the key name as *homethumb* (case sensitive) and *enter the name of the image* you uploaded in the value field.
Make sure you enter the name only in the value field, not with .jpg extension.
5. Then add the custom field to the post.
